

Devil's Degree is a band consisting of 5 members. They create their own songs within the Alternative Rock / Grunge genre and have developed their own sound within it. In June 2024, they recorded their first demo, which is now available on Spotify, YouTube, and other streaming services, and they are building a growing fan base.

With the launch of the website devilsdegree.nl, performances in cafes, participation in the Haarlem PopScene On Tour, and an energetic performance during Alphen on Fire, they have brought their own music to a wider audience.

In January 2025, they will perform live on Radio Benelux and will enter the studio to work on their first full album. With their unique sound and growing fan base, they are looking forward to what the future holds with great energy.
